2010 Workshop Summary

The Center for Transportation and the Environment (CTE) and the NCDOT hosted the 2010 summer TRB workshop in Raleigh, NC. The event took place June 6-9. It was the first section meeting in a decade.

A total of 537 people from 39 states and Canada attended. AASHTO, FHWA, FTA, NCDOT and other state DOT's, and a large number of consulting firms were among the varied participants.

Our committee sponsored several sessions. There were about 20 vendor and sponsor displays outside the breakout rooms. Statistics on attendance at the workshop are on the reverse side. Presentations from the workshop are available on the committee website.

2011 Mid-Year Workshop

Our next mid-year event will be held concurrently with ICOET. This is the first time our committee has met with ICOET. The event will take place at the Westin Hotel in downtown Seattle.

The dates are August 21-25. "The ICOET 2011 theme, 'Sustainability in Motion,' focuses this year's conference on moving us toward transportation solutions that protect natural ecosystems while supporting our economy and communities."

You can find more information on the event at: www.icoet.net/ICOET_2011/

2012 and Beyond

For our 2012 mid-year workshop we head back to Little Rock, AR. We were last in Arkansas in 1990. Little Rock is a very popular venue. The event is tentatively set for June. The Arkansas DOT is hosting.

For 2013, we are looking toward Minnesota and potentially other venues.
Mid-Year Workshop Subcommittee Report - 2011
