TIPS FOR DRIVERS

- ◆ Do not idle your school bus for longer than five (5) minutes to build up air pressure. Additional idling does not help the school bus get warmer.
- ◆ Do not idle your bus while loading or unloading on school grounds.
- ◆ Driver must be within 3 feet of the bus while it is running. No exceptions!

TIPS FOR ADMINISTRATORS

- ◆ Buses should not park on school grounds near building air-intake systems.
- ◆ Buses should not park “nose to tail” when it can be avoided.
